

## Advances in pediatric retina: clinical practice, Diagnosis, & management

### تازه های شبکه ای اطفال: چالشهای تشخیصی و درمان

با امتیاز بازآموزی – شناسه برنامه: ۲۳۷۱۰۳

Scientific Director; Fatemeh Abdi

دبیر علمی: دکتر فاطمه عبدی

(August 7<sup>th</sup> 2025 )

زمان برگزاری: پنجشنبه ۱۶ مرداد ۱۴۰۴ ساعت ۹ الی ۱۲:۳۰

محل برگزاری: سالن همایش های بیمارستان حضرت فاطمه (س)

|   | Topics                                                                                                                           | Time        | Speakers                                                                                                                                                                            |
|---|----------------------------------------------------------------------------------------------------------------------------------|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | systemic associations of pediatric retinal disease                                                                               | 9:00-9:15   | Maryam Kachuei, MD                                                                                                                                                                  |
| 2 | Genetic testing & counseling for pediatric retinal disease, new available gene therapy                                           | 9:15-9:30   | Golnaz Khakpoor, MD, PHD                                                                                                                                                            |
| 3 | Imaging techniques for pediatric retinal disease (Tips for optimizing imaging in children & dealing with cooperative challenges) | 9:30-9:45   | Elias Khalilipour, MD                                                                                                                                                               |
| 4 | Managing pediatric uveitis & its retinal implications                                                                            | 9:45-10:00  | Paha Anvari, MD                                                                                                                                                                     |
| 5 | Pediatric retinal surgery: Common pediatric retina surgical procedures                                                           | 10:00-10:15 | Mohammadreza Mehrabi Bahar, MD                                                                                                                                                      |
| 6 | Challenges in pediatric anesthesia, post op care & outcome                                                                       | 10:15-10:30 | Pooya Derakhshan, MD                                                                                                                                                                |
| 7 | Break                                                                                                                            | 10:30-11:00 |                                                                                                                                                                                     |
| 8 | Case based discussion                                                                                                            | 11:00-12:30 | Dr Masood Naseripour,<br>Dr mohammadmahdi Parvaresh,<br>Dr Alireza Ramezani,<br>Dr Elias Khalilipour,<br>Dr Mohammadreza Mehrabi Bahar,<br>Dr Maryam Kachuei,<br>Dr Golnaz Khakpoor |
